EN

Discharge line hose in dredging operations

Application: heavy duty steel cord hose used as a flexible connection in discharge lines. Used in heavy-duty applications for delivery of sand, gravel and debris mixed with water.

Also available with: enlarged ends or built-in fittings with rubber protected flanges.

Possible to order with: portions of integrated flotation or fully integrated flotation.

Temperature: from -40°C (-40°F) to +70°C (+158°F).

Construction

Tube: black, smooth, SBR/NR rubber with excellent resistance to abrasion and lacerations.

Reinforcement: plies of steel wire cord divided by layers of rubber to improve the hose flexibility.

Cover: black, smooth (wrapped finish), synthetic rubber, highly resistant to sea water, weathering and abrasion.

Also available upon request: 1.Different diameters.

RU

Рукав для разгрузочных линий дражных систем

Применение: напорный рукав с металлокордом, используемый в качестве гибкого соединения между трубами разгрузочных систем. Используется в особо тяжелых условиях для подачи песка, щебня и гравия, смешанных с водой. Производится: с расширенными концовками, с завулканизированными обжимными или отбортованными фланцами. Возможны версии: отдельные плавучие участки или полная плавучая версия рукава.

Температура: от -40°C до +70°C.

Конструкция

Внутренний слой: чёрный, гладкий из смеси синтетического и натурального каучука SBR/NR, с повышенной стойкостью к истиранию и разрывам.

Усиление: встроенный металлокорд с прослойками из каучука для повышенной гибкости.

Покрытие: чёрное, гладкое (с отпечатком текстильного бандажа), из синтетического каучука, особенно устойчивое к морской воде, атмосферным воздействиям и к истиранию.

В наличии по запросу: 1.Другие диаметры.

Above technical data are referring to applications at room temperature (+20°C).

IVG Colbachini is not liable for the use that differs from what is confirmed in their catalogues, product sheets, offers, order confirmations and contained recommendations. For a correct use refer to "Recommendations for the selection, storage, use and maintenance of rubber hoses" by Assogomma, available on www.ivgsa.it.

With the aim to improve the product, IVG reserves the right to modify the hose specifications without giving any prior notice.

SAFETY INFORMATION – USER RESPONSIBILITIES

The service life of rubber hoses mainly depends on the dedicated use. Equipment and systems where the hose is installed must be designed safely. Since our hose can be designed for different applications, IVG Colbachini SpA cannot guarantee the proper functioning of the product for all situations. The analysis of the technical aspects related to specific uses must be performed by the users when choosing the product that meets their requirements. So, in relation to the variety of operating conditions and applications of the IVG hose, the user is solely responsible for the final choice of the product deemed suitable to satisfy the performance and safety requirements called for the application.

The information and technical data shown in the product data sheets must be examined by users with appropriate technical skills.

IVG Colbachini is not responsible for other uses, identified by the end user, that are different from the one shown in its catalogues, product sheets, offers, order confirmations and any recommendations attached.

An inappropriate choice of the product or a failure to follow the procedures of installation, use, maintenance and storage of the hoses may lead to a hose break and cause material damage and/or serious injury to people.

For the selection and proper use of the IVG products you can also refer to the document "Recommendations for selection, storage, use and maintenance of rubber hoses" provided by Assogomma and available on www.ivgspa.it. These recommendations are according to the international standard ISO 8331, "Plastic and rubber hoses and hose assemblies - Guidelines for selection, storage, use and maintenance."

For safety reasons, never exceed the working pressure indicated in the product data sheet.

For specific applications of rubber hoses, please refer to the legal requirements or specific standards; moreover additional recommendations for particularly critical applications are available.

For further information, contact the Marketing department (marketing@ivgspa.it).
