

Peristaltic

Peristaltic pump hose

Application:

softwall rubber hose with a thick wall used in Peristaltic pumps and suitable to convey various fluids (also very dense), whose organic qualities must remain unchanged compared to the traditional impeller pumps. Depending upon the fluid to be conveyed, the following types of Peristaltic pump hose are available:

- 1) for abrasive fluids
- 2) for acids at low concentration
- 3) for liquid food
- 4) for oily and fatty foods.

The best performances on the market
Available with rectified cover
Very high customization

Tube:

smooth, in rubber suitable for the service.

Reinforcement:

high strength synthetic cord.

Cover:

black, smooth (wrapped finish), abrasion resistant rubber.

Branding:

continuous stripe "IVG...", or ink branding on hoses with rectified (machine ground) cover.

Peristaltic

Variants available on request:

1. Internal diameter, wall thickness and hose length are determined by the type of pump. For the choice of the correct product, it is therefore necessary to contact the IVG sales department.
2. The range of diameters goes up to I.D. 125 mm.
3. The hoses are supplied in application lengths.
4. Upon request by the customer hoses are available with rectified cover.
5. Most common working pressure is 5 bar, there is also a 15 bar working pressure version available.
6. Contact IVG for the choice of hose based on the type of fluid that needs to be conveyed.

SPECIAL DETAILS

WARNINGS AND PRECAUTIONS

Rubber hoses have a service life proportional to their usage.

The equipment and systems where the hose is installed must be designed to ensure safe operation. Given the wide range of possible applications, IVG Colbachini does not guarantee suitability for all specific uses. The selection of the most appropriate product for the intended application, ensuring the required performance and safety standards, is the sole responsibility of the user.

IVG Colbachini shall therefore not be held liable for any use other than those indicated in its catalogues, product data sheets, quotations, order confirmations, or any accompanying recommendations.

Improper product selection and/or use, or failure to comply with installation, operation, maintenance, and storage procedures, may result in hose failure and cause damage to property or personal injury.

IVG Colbachini manufactures and markets both assembled hoses and hoses supplied without fittings.

Assembled Hoses

Before being placed on the market, the hose assembly is subjected by IVG to manufacturing control tests carried out by qualified personnel.

IVG declines all responsibility for any subsequent modifications, disassembly, or reinstallation of fittings performed by the user, as well as for uses that differ from those indicated in the product data sheet or in the absence of maintenance programs and periodic inspections.

Hoses and Fittings as spare parts

The user is responsible for assembling the hose and fittings, ensuring proper hose/fitting compatibility and compliance with the technical specifications for use. It is recommended that the hose assembly be subjected to a pressure tightness test carried out by qualified personnel.

IVG declines all responsibility in this regard.

Precautions

For proper selection and correct use of IVG products, reference should also be made to the recommendations issued by Assogomma, available at www.ivgspa.it, in accordance with ISO 8331 regarding installation, maintenance, methods and duration of use, as well as fitting stability and tightness.

For safety reasons, the working pressure indicated in the product technical data sheet must never be exceeded.

In general, continuous operation at maximum allowable pressure and/or temperature may significantly reduce the hose service life. Regular inspections and hydrostatic testing at the specified test pressure must therefore be carried out. Hydrostatic tests must be performed by adequately trained personnel using suitable equipment and in accordance with recognized testing standards.

For specific applications of rubber hoses, reference should be made to applicable legal requirements or compliance standards. Additional recommendations are available for particularly critical applications. For further information, please contact info@ivgspa.it.
